

# LEINOS 725

## Coating Fleece

**Application:** LEINOS Coating Fleece for fleece reinforcement and subsequent application with LEINOS Silicate-Hybrid Paint 694 indoors.

**Technical Characteristics:** Reinforcement for embedding in accordance with VOB DIN 18363.

**Package Sizes:** 50 m

**Processing:** Brush, roll or spray on LEINOS Silicate-Hybrid Paint in accordance with the application instructions. Embed LEINOS Coating Fleece from the roll or cut to size into the wet paint without creases or bubbles and with an overlap of approx. 5 cm. Glue the inside of the roll to the wall and do not overlap. Separate using a double cut and remove both sections. Join LEINOS Coating Fleece seamlessly. Press the joint area flush. If necessary, add the missing embedding material in the seam area due to the removal of the edge strips and level the joint seam with a wallpapering spatula. Then - when wet - apply LEINOS Silicate-Hybrid Paint again evenly.
