

LEINOS 924

Wooden Floor Soap

Application: For cleaning, care and finishing of soaped and leached, as well as natural and white oiled wood surfaces. For the initial treatment of softwood floors subject to normal wear, e.g. in living and sleeping areas, for wall and ceiling panelling, as well as for furniture and doors. Also suitable as an intensive cleaning agent for heavily soiled outdoor surfaces, e.g. wooden decking, fences, doors, stone tiles, brickwork, etc. Ideal for cleaning and removing fungal and algae infestation. Highly concentrated.

Technical Characteristics: Liquid consistency, very economical, strong cleaning effect, highly moisturising. Made from purely plant-based, renewable raw materials.

Color: 002 Colourless, 202 White

Ingredients: Water, potassium soaps of vegetable fatty acids, citric acid, xanthan gum, titanium dioxide (white).

Package Sizes: 1l / 2,5l

Processing: For intensive cleaning: Dilute Wooden Floor Soap 1:20 to 1:40 with warm water, depending on the degree of soiling. E.G: mix 250 ml Wooden Floor Soap with 5-10 litres of water. Apply the cleaner evenly with a wide brush or paintbrush. The treated surface should be sufficiently wet. Leave to work for approx. 20 minutes. Then scrub/wash the surface thoroughly with a brush. Repeat the treatment if necessary. Rinse the surface with water and leave to dry. The surface can then be treated with Terrace Wood Oil 236. Tip: In the case of heavy fungal and algae infestation, leave the Wooden Floor Soap to work for 3-4 days, then rinse with water. Remove any remaining stains with a hard brush. Clean tools with water immediately after use. Do not use at temperatures below +8 °C. Initial treatment of softwood floors: Add soap to the mop water (1:10), rinse a cotton cloth or mop in it, wring out slightly and damp mop the floor. Leave to act briefly and rinse the mop with clear water. Maintenance cleaning: Add soap to the mop water (1:40) and damp mop the floor as described above. Leave to work for a short time and rinse the mop with clean water, then remove stubborn dirt with a white pad and a little soapy water. Then wipe with a clean soap solution and leave to dry. Do not rinse with clean water!

Consumption: Intensive Cleaner: 1 litre of diluted concentrate (1:20 - 1:40) is sufficient for approx. 120-150 m². Initial treatment: 1 litre of diluted concentrate at a mixing ratio of 1:10 is sufficient for approx. 10-25 m². Underhelmet cleaning: At a mixing ratio of 1:40, 1 litre of concentrate is sufficient for 400-600 m².

Storage and Shelf Life: Store in a cool, frost-free and dry place. Keep opened containers tightly closed.

Special Notes: EAK: 07 06 01 / GISCODE: GG10

Hazard statements: Safety data sheet available on request.

Precautionary statements: Keep out of reach of children. IF SWALLOWED: Call a POISON CENTER/doctor if you feel unwell. Do NOT induce vomiting. Avoid release to the environment. Dispose of contents/container to an appropriate recycling or disposal facility.
