

LEINOS 946

Tannic acid Stain Remover

Application: Water-based cleaning agent for removing dark discolouration from oak wood. Not suitable for smoked oak.

Technical Characteristics: Removes dark discolouration from wood containing tannic acid, such as oak. Has a brightening effect on older, darkened wood surfaces.

Color: Colourless.

Ingredients: Water, oxalic acid, non-ionic surfactants, polyaspartic acid.

Package Sizes: 0,25 l

Processing: Shake before use. At high temperatures, the wood should be moistened. Avoid direct sunlight as far as possible. Apply a thin layer of Tannic acid Stain Remover to the discoloured area. Leave to work for about 15 minutes. Then rinse the surface thoroughly with clean water. In the case of stubborn discolouration, further treatment with Tannic acid Stain Remover may be necessary. Once completely dry, the area can be treated with a care product, oil or wax. After removing stubborn discolouration, a light sanding may be necessary before refinishing.

Consumption: Consumption depends on the type and degree of soiling.

Thinning and Cleaning Agents: Water.

Storage and Shelf Life: Store in a cool and frost-free place. Shelf life is at least 24 months if unopened.

Special Notes: GISCODE: GG10 / EAK: 07 06 01

Hazard statements: Safety data sheet available on request.

Precautionary statements: Keep out of reach of children.
